Summary

I help **businesses design** and **build custom software solutions**, from **defining their needs to deploying to production**. I work **within your team** or **manage projects from start to finish**. Available for **short-, medium- and long-term assignments** in **Hauts-de-France** and **Île-de-France**, as well as **remotely**.

Skills

Core skills: IT consulting, AI R&D, Software development, IT project management

Languages: C/C++, Python, Java, JavaScript/TypeScript, PHP

Frameworks: Django, Flask, FastAPI, Express, Node, Vite, Next, React, React Native, Vue, Symfony, TailwindCSS, Shadcn/ui, Electron

Technical skills: Full-stack, Mobile, IoT, Docker, Git(Hub/Lab), CI/CD, Cloud (AWS/Azure), AI, Linux, SQL/NoSQL, Image processing

Methodologies: Agile, Kanban, Microservices, Object-oriented programming (OOP), Design patterns, Software testing, SEO

Experience

Software Engineer - IT Consulting & Full-stack Development

Weldom - Breuil-le-Sec — May 2026 - Present

- Contributing to the **evolution** of a business application **deployed** in **more than 300 stores**.
- **Designing and developing** custom software solutions (**web, mobile, APIs**).
- Managing **testing**, **acceptance testing** and the **operational maintenance** of applications.
- Analysing and **resolving incidents**, **fixing** defects and implementing **functional enhancements**.

Software Engineer - IT Consulting & Development

Freelance Consultant - France — Jan 2026 - Present

- **Designing and developing** custom software solutions (**web, mobile, APIs, automation, AI**).
- Defining **scalable cloud architectures** and deploying through **Docker, CI/CD and servers**.
- Building **PoCs, MVPs and prototypes** to quickly validate product ideas **→ reducing timelines** by **several months**.
- **Supporting technical teams** or **managing entire projects** from design to deployment.

Software Engineer - Full-stack, DevOps & AI R&D

ONTBO - Compiègne, France — Jan 2024 - Dec 2025

- Developing applications integrating **GenAI, data science and affective computing**.
- Designing **backends, REST APIs and user interfaces** with **Python, FastAPI, TypeScript, React/Vue**.
- Setting up **automated cloud deployment** pipelines (**Docker, CI/CD, AWS**) **→ more than 8 services deployed** in **under 5 minutes**.
- Rapidly developing **R&D prototypes → short development cycles** for **innovative solutions**.

Software Engineer - AI & Computer Vision

Nightingale Project - Mainz, Germany Feb 2025 - Mar 2025

- Implementing **machine learning** models for **automatic 2D/3D wound detection**.
- **Processing** and **analysing** a medical dataset ➔ **more than 1,500 wound images** from **more than 450 patients**.
- Designing **real-time image analysis pipelines** and extracting **biomedical features**.
- Deploying models through **REST APIs** and **Docker** containerisation ➔ **400% faster deployment**, **independent of the target environment**.

nightingaleheart.com

Software Developer - Consultant

UTeam - Compiègne, France Jan 2020 - Dec 2023

- Developing and maintaining **full-stack business applications** and **embedded** systems (**C/C++, IoT, ROS**).
- Contributing to several **robotics and R&D** projects.
- Analysing client requirements and providing technical support to **startups, SMEs and laboratories ➔ more than 10 projects** delivered.
- Contributing to **software architecture** and the adoption of **sound engineering practices**.
